

Residential Weatherization Program - LIHEAP

PLEASE complete ALL sections and sign form to ensure proper and prompt payment of rebate.

Member Address Information (person receiving rebate) Check if wind or solar generation is installed.
First Name, Last Name, Account Number, Phone, Address, City, State, Zip, Email Address

Equipment Location Information Check if same address as above:
First Name, Last Name, Account Number, Phone, Address, City, State, Zip, Email Address

Key Program Requirements: (See all Terms and Conditions on back or separate sheet)
Invoice Requirement: Invoice must be itemized with total costs shown for each installation type.
DATE INSTALLED Before beginning project, ensure that you and/or your contractor read all Terms and Conditions.
HEATING/COOLING SYSTEM TYPE (check one)
Electric Heat - check if electric system heats 75% of the home and operates prior to any non-electric backup.
Central AC Only - check if central air conditioning system provides cooling to the entire home (except basement) and the heating system does not qualify as Electric Heat. Homes heated with natural gas do not qualify.
YEAR HOUSE BUILT (approx.)
HOUSE SIZE (sq. ft.)
INSTALLER OF UPGRADES
Homeowner
Contractor Company Name:
Description of Work:

Table with 8 columns: Type of Installation, Area (sq. ft.), Original Conditions (Material/Insulation Type, Thickness (inches), R-Value), Installed Upgrades (Material/Insulation Type, Added Thickness (inches), Added R-Value). Rows include Attic/Ceiling Insulation, Wall Insulation, Foundation Insulation, Infiltration Control, Duct Insulation/Sealing*.

Table for rebate calculation with 9 columns: Type of Installation (continue from above), Final R-Value, Total Cost (no labor if self-installed), Electric Heat (Rebate Calculation, Maximum Rebate, Rebate), Propane Heat with Central AC (Rebate Calculation, Maximum Rebate, Rebate), TOTAL REBATE. Includes instructions: Complete for heating/cooling system checked. For rebate, enter lesser of calculated and maximum amount shown for each installation type.

Member and Contractor Agreement (Signatures Required)
I verify that the above described equipment was installed on the date and location specified. I agree to all program requirements provided (either separately or on back of this form) and that my electric cooperative reserves the right to inspect all equipment and verify information before issuing a rebate.
Member Signature, Date, Contractor/Vendor Signature, Date
Office Use Only: Cooperative ID, Employee Name, Notes, Authorized Amount

If your rebate does not exceed \$ 250.00 you have the option of it being applied to your electric bill or receiving a check. Please select one of the following.
Send a Check
Apply to Electric Bill
Form R10-L (Rev. 12/17)

Terms and Conditions - Residential Weatherization Program - LIHEAP

Program Offer: The Program covers products purchased and/or services rendered on or after **January 1, 2018**.

Member must participate in the Iowa LIHEAP program at the time of installation. Weatherization materials or labor provided through a CAAP agency, or their agent, or any other organization cannot be claimed under this program.

Rebate Amounts:

Rebates vary by installation type and by type of primary heating and cooling system (See Table 1). Maximum rebates are the maximum amounts allowed per home under this program for as long as this program is offered.

House Requirements:

- Only residential homes built prior to 1996 will qualify.
- Residential home upgrades only - new additions do not qualify.

Primary Heating and Air Conditioning (AC) System

Homes must be heated primarily with electric heat or cooled with a central air conditioning system. Qualifying systems as defined for determining appropriate rebates for this program are shown below.

- Electric Heat - electric system heats 75% of the home and operates prior to any non-electric backup. Portable space heaters do not qualify as part of the primary heating system.
- Central AC Only - central air conditioning system provides cooling to the entire home (except basement) and the heating system does not qualify as Electric Heat.
- Home with natural gas heating do not qualify (contact gas supplier for any rebates).
- Equipment is subject to Cooperative inspection and minimum electrical use requirements.

Invoices

- Invoices must be provided with the application and confirm the total costs used to calculate rebates for each type of installation.
- Projects must have a total cost of \$150 or more and can include more than one type of installation as defined for this program.
- Contractor invoices must be itemized with total costs (material and labor) shown for each qualifying installation type.
- Homeowners should inform their contractor of these requirements prior to the installation.
- Homeowners cannot include labor in the total cost for self-installed projects.

Qualifying Installations

Insulation:

The original R-value for insulation in the home must be below certain levels and increased to minimum levels as shown on Table 2.

If R-values are unknown, Table 3 can be used. Multiply the insulation thickness by the appropriate R-value/inch to determine the R-value of insulation in the home. If unsure of the insulation material, take a sample to a local building supply store where someone can identify it. Descriptions of insulation materials can be found at energy.gov/energysaver/articles/insulation-materials.

Infiltration Control:

This includes the installation of house wraps (such as Tyvek), vapor barriers, permanent weatherstripping, caulking and foam sealing. Temporary sealing such as removable strip caulking and plastic window covers do not qualify.

Duct Insulation/Sealing:

Professional installation is required. Only ducts located in an unconditioned space such as the attic or crawlspace will qualify. Work where both the ducts and heating system are located in the basement does not qualify. Duct sealing must be done using a mastic sealant (cannot be sealed with duct tape).

Recommendations and Cautions:

Professional installation is recommended for most projects. Self-installers should acquire the necessary expertise to guarantee a quality installation and ensure that the resulting work will not compromise the safety and integrity of the home.

Most air leaks that cause drafts can be sealed without problems, but caution must be taken when tightening a home. Air pressure differences and inadequate ventilation can result in backdrafting of combustible appliances, moisture and condensation problems and unsafe levels of contaminants including carbon monoxide and radon.

When adding insulation, caution should be taken to avoid creating a vapor barrier that can trap moisture inside building components. For example, a rigid board insulation added to the outside of an insulated wall, without a vapor barrier on the interior side of the wall, can become the primary vapor barrier where condensation can occur.

Terms and Conditions continue on an additional page...

Table 1. REBATES

| Type of Installation | Primary Heating/Cooling System | |
|--------------------------|--------------------------------|----------------------|
| | Electric Heat | Central AC Only |
| Attic/Ceiling Insulation | 80% up to \$800 Max. | 20% up to \$150 Max. |
| Wall Insulation | 80% up to \$800 Max. | 20% up to \$150 Max. |
| Foundation Insulation | 80% up to \$800 Max. | N/A |
| Infiltration Control | 80% up to \$200 Max. | N/A |
| Duct Insulation/ Sealing | 80% up to \$200 | N/A |
| TOTAL | \$2800 Maximum | \$300 Maximum |

Table 2. REQUIRED INSULATION LEVELS

| Type of Installation | Pre-Existing Maximum | Post-Install Minimum |
|--------------------------|----------------------|-----------------------|
| Attic/Ceiling Insulation | R-20 | R-38 |
| Wall Insulation | R-13 | R-13, Add R-5 Minimum |
| Foundation Insulation | R-8 | R-5, Add R-5 Minimum |
| Duct Insulation/ Sealing | R-3 | R-8 |

Table 3. TYPICAL R-VALUES FOR INSULATION

| Insulation Type | R-value/inch (OLD) | R-value/inch (NEW) |
|--------------------------------|--------------------|--------------------|
| Flexible Batts | | |
| Fiberglass | 2.6 | 3.2 |
| Rockwool | 3.1 | 3.6 |
| Loose-Fill | | |
| Cellulose | 3.2 | 3.5 |
| Fiberglass | 2.0 | 2.4 |
| Rockwool | 2.4 | 2.9 |
| Perlite | 2.3 | 2.7 |
| Vermiculite | 2.0 | 2.4 |
| Rigid Foam Boards | | |
| Polystyrene, molded (beaded) | | 4.0 |
| Polystyrene, extruded (smooth) | | 5.0 |
| Polyurethane | | 6.0 |
| Polyisocyanurate | | 8.0 |
| Spray Foam Insulation | | |
| Urethane | | 6.0 |
| Foam Roofing | | 8.0 |

Terms and Conditions - Residential Weatherization Program - LIHEAP

Program Offer: The Program covers products purchased and/or services rendered on or after **January 1, 2018**.

... Continued from previous page

General Terms and Conditions

Rebates shall be pro-rated based on the percent of power supplied by the Cooperative if the member has distributed generation.

Application Information: Missing or incorrect information on the application may delay processing and delivery of the rebate. An invoice is required and should include specific product information, including the brand, model, serial number and date of purchase of the energy efficient measures. Other information including manufacturer's equipment performance sheets may be required upon request.

The Cooperative reserves the right to verify sales transactions and to have reasonable access to the Member's facility to inspect pre-existing equipment (if applicable) and energy efficient measures installed under this program.

Warranty Information: The Cooperative makes no warranties, expressed or implied, with respect to equipment operation, material, workmanship or manufacturing. The Cooperative does not guarantee that a certain level of energy or cost savings will result from the use of products covered by this program.

Limitation of Liability: The Cooperative's liability in connection with this program is limited to paying the rebate specified when all terms and conditions have been satisfied. Under no circumstances shall the Cooperative be liable for any consequential or incidental damages or tax liability resulting from participation in this program.

Participant Certification: Participating Member certifies that he/she purchased and installed the equipment listed on their application at the defined location served by the Cooperative. The Member agrees that all information provided is true and that he/she has conformed to all program requirements. If the equipment and application does not comply with the Cooperative's rules and qualifications, the rebate amount may be denied or adjusted.

Program Changes/Termination: The Cooperative reserves the right to extend, modify (including incentive levels) or terminate this Program at any time without prior or further notice. The Member is responsible for checking with the Cooperative to determine whether the program has been changed or is still in effect.

Members must apply for rebates within six (6) months of the purchase date (as shown on the Member's invoice). Past eligibility, however, does not guarantee that equipment will meet criteria for current programs in effect.
